... to the left. Okay. You're looking at a map of the United States, 1900 to 2000. Um, and what I want you to do is I want you to circle the states that have the highest percentage of people 65 years, over 65 years old. So, for example, in this state, Utah, we can see that 62% of the population is age 65 years, over 65 years old. And then we also see that California has the lowest percentage of people age 65, over 65 years old. So, what do you think is going on here? What's your hypothesis? Um, I don't know. It looks like we have a lot of people who are older than 65, but not a lot of people who are over 65. Yeah, good thinking. All right, well, let's move on to the next state.

### **Conversation Format**

Speaker speaker\_0: ... to the left.

Speaker speaker\_1: Okay.

Speaker speaker\_0: You're looking at a map of the United States, 1900 to 2000. Um, and what I want you to do is I want you to circle the states that have the highest percentage of people 65 years, over 65 years old. So, for example, in this state, Utah, we can see that 62% of the population is age 65 years, over 65 years old. And then we also see that California has the lowest percentage of people age 65, over 65 years old. So, what do you think is going on here? What's your hypothesis?

Speaker speaker\_1: Um, I don't know. It looks like we have a lot of people who are older than 65, but not a lot of people who are over 65.

Speaker speaker\_0: Yeah, good thinking. All right, well, let's move on to the next state.
